Subject: Placement Results Follow-Up

Good afternoon,

You should have recently receive your placement exam results in both mathematics and second languages via a separate email from Jacob Johnson, the Registrar. Please review the information attached to the previous email and share it with your advisor before course registration. The placement result listed is where you should begin coursework in the respective areas.

If your placement results indicate that you have not completed the mathematics placement exam(s) please complete them as soon as possible. Keep in mind, all students **must** complete the pre-calculus mathematics placement exam.

If you have not yet taken the second language placement exam and you believe you could test above an introductory level, please complete the language placement exam as soon as possible.

In the coming weeks you will receive a series of emails from the Registrar's Office explaining the advising and course registration process for first-year students and when and how to submit your dual credit and advanced placement scores. You can find a timeline of upcoming communication and tasks at <https://www.centre.edu/admission-aid/admitted-students/new-student-next-steps>

Feel free to let me know if you have questions or concerns regarding your placement results. We look forward to having you on campus soon.

Lindsey Cochran
Assistant Registrar
Centre College
